Claims 2-5 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 1 and 14 recite that the alveolar opening is determined from the course of the oxygen saturation as the airway pressure is changed. However, claims 2 and 15 recite that the saturation is held approximately equal to a reference value and the FiO₂ is changed. This is contradictory. Clarification is required.

Claims 1, 6-14, 16, and 17 are allowed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Stenzler determines alveolar opening using lung volume.

Huygen et al determines alveolar opening from lung sounds.
